maps of New Zealand

PUBLISHED BY DEPARTMENT OF LANDS AND SURVEY

CROWN COPYRIGHT ON MAPS

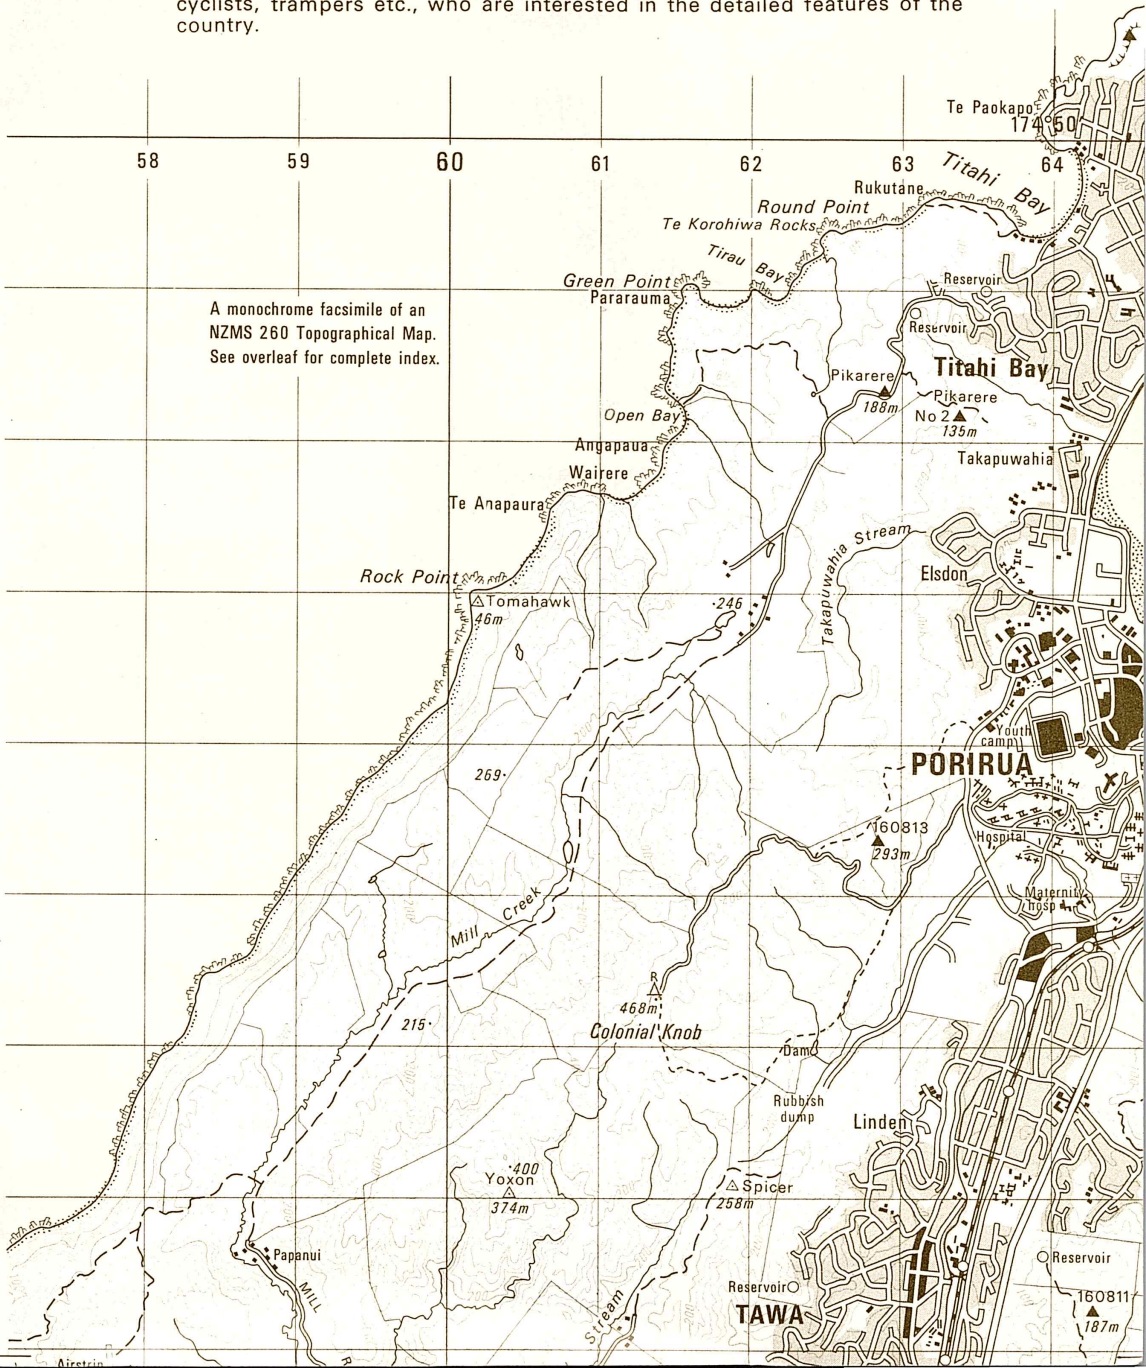
Maps published by the Department of Lands and Survey are covered by the Copyright Act 1962. A map licence must be obtained from the Surveyor General, Private Bag, Wellington, before any reproduction is made. There are some cases, however, in which exemption from the payment of royalty may be made where limited use is made of the map.

CROWN COPYRIGHT ON AERIAL PHOTOGRAPHS

Aerial photographs and half-tone transparencies made available by the Crown are covered by the Copyright Act 1962. The permission of the Surveyor General, Department of Lands & Survey, must be obtained before an aerial photograph or half-tone transparency is copied or reproduced in any way for private, trade or other purposes. Inquiries should be directed to Head Office or to any Chief Surveyor. Each application for use of aerial photographs, or half-tone transparencies will be treated on its merits and in some cases a reproduction fee may be charged.

metric topographical maps

These show all features such as roads, railways, towns, drainage pattern, vegetation, etc., with relief by contour lines — most useful for motorists, cyclists, trampers etc., who are interested in the detailed features of the country.



INDEX TO NORTH ISLAND

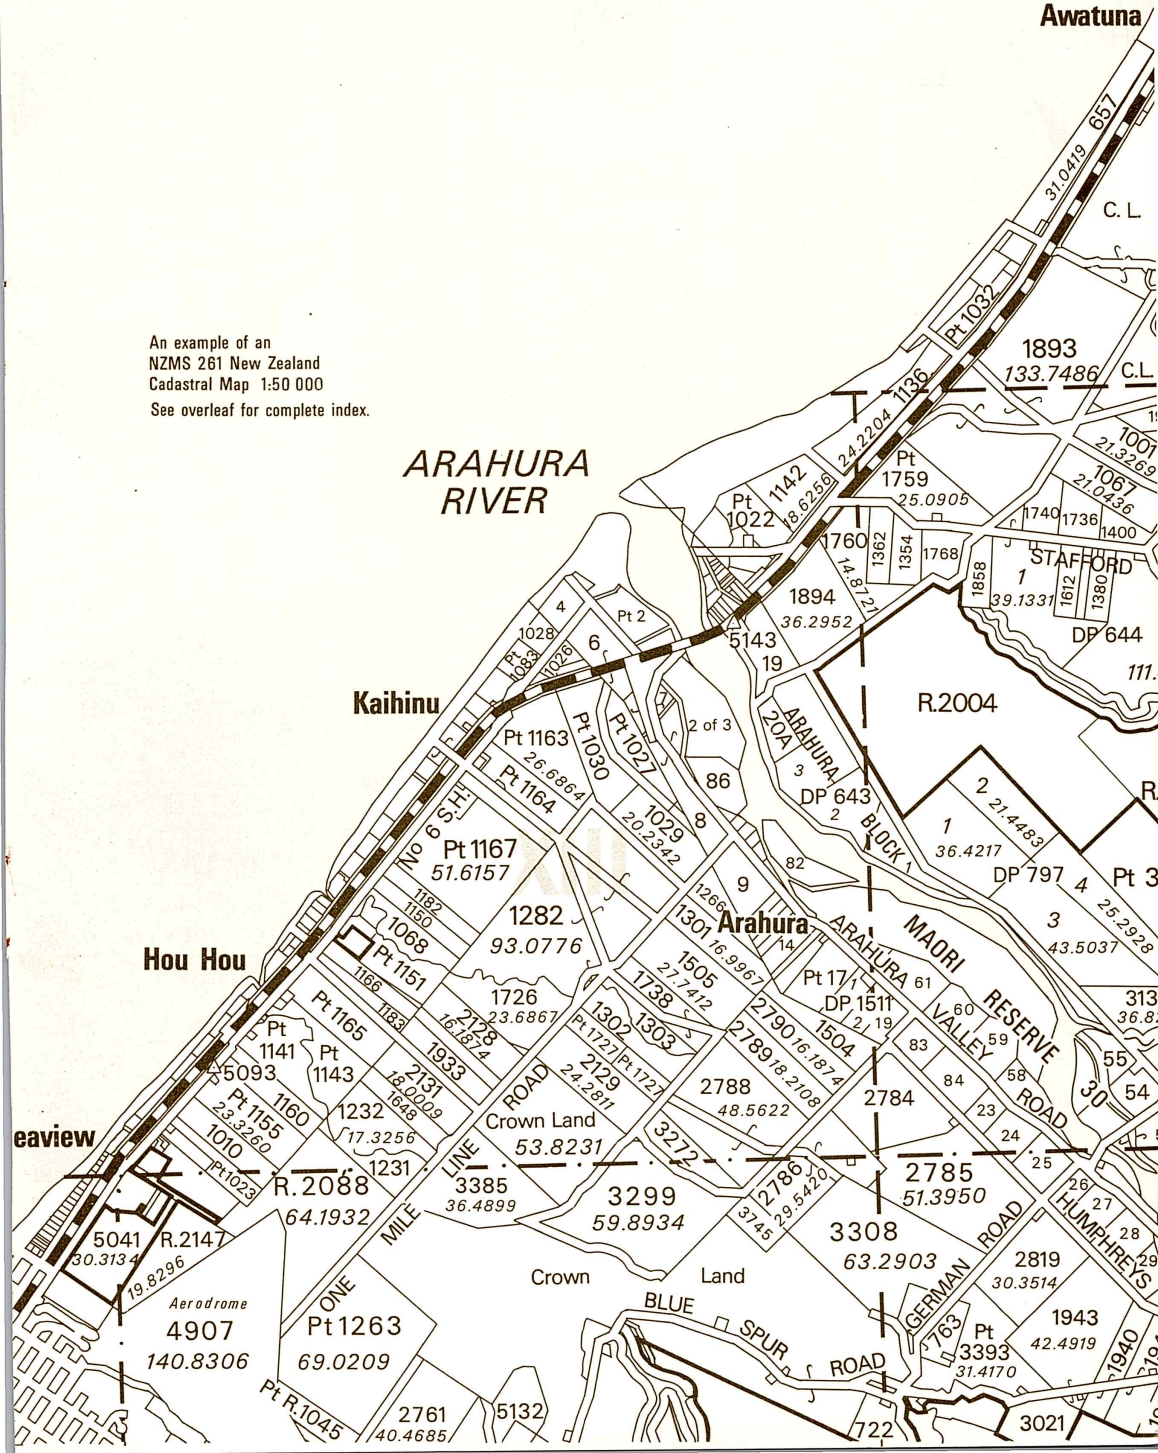
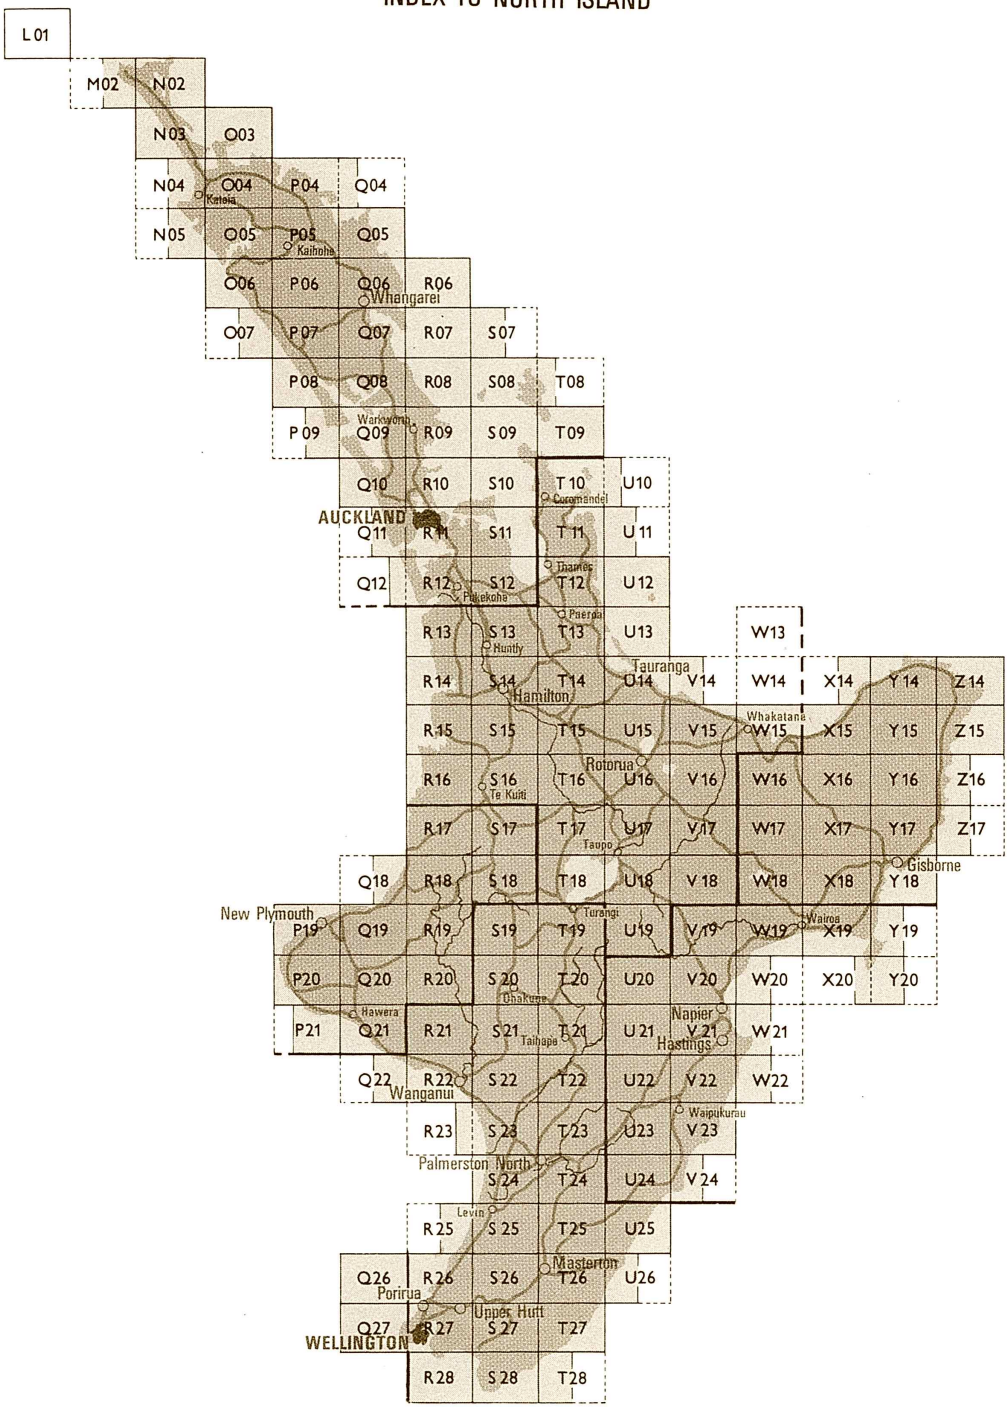
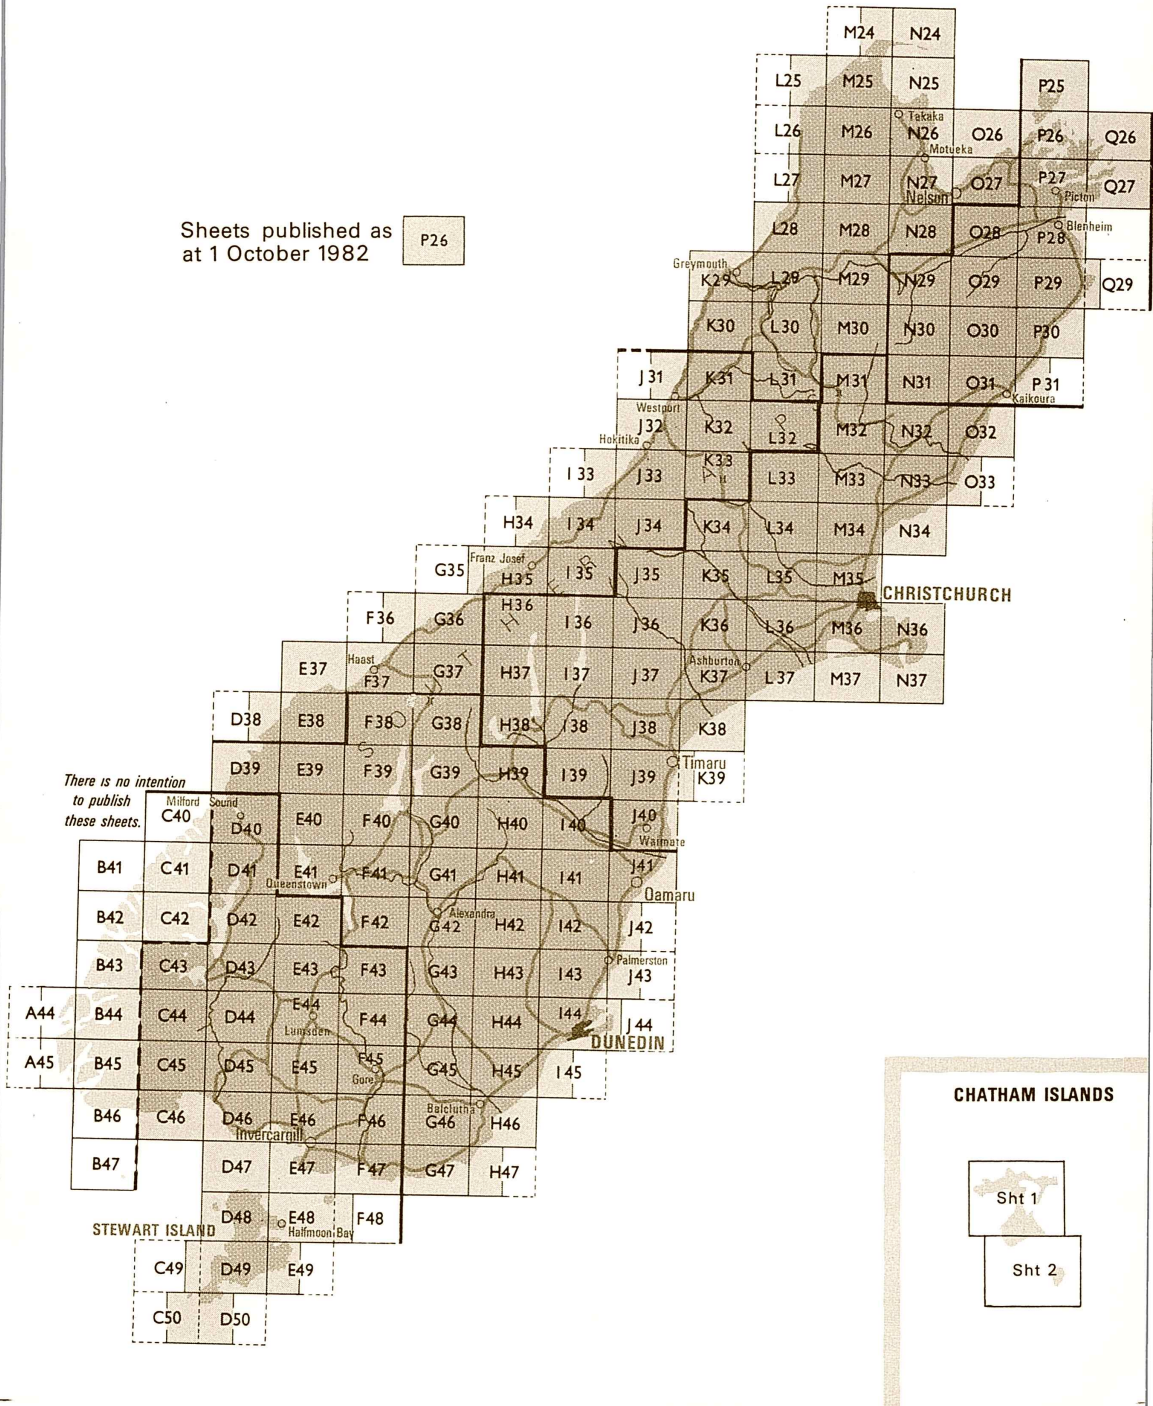
cadastral maps



INDEX TO NORTH ISLAND



INDEX TO SOUTH ISLAND



Cadastral information shown on these maps includes the land subdivision boundaries, section or lot numbers, areas, survey district and survey district block boundaries, Maori block boundaries, names, roads, railways, reserves, National Park and State Forest Park boundaries, shorelines, rivers and streams, trig stations, and names. Some of the map series are produced with an overprint showing registration district boundaries, city, borough and county boundaries and names, and water areas. Others have this data included with the base map.

NZMS 261 NEW ZEALAND CADASTRAL MAP 1:50 000

This metric series has the 1:50 000 sheet lines and numbering system as detailed in this brochure. The base cadastral information is printed in black and the overprint with county boundaries, registration districts and water areas is in blue.

Price: $2.00

TOWN AND URBAN CADASTRAL MAPS

Cadastral information of town and urban districts of New Zealand is available from the Chief Surveyor, Department of Lands and Survey in the Land District in which the town is situated.
The maps are kept up to date and are produced in plan print form only.
Several map series are available.

NZMS 189 N.Z. CADASTRAL MAP—TOWN SERIES

The maps are drawn to a standard specification and show cadastral information together with the county and registration district boundaries.
Scales used are 1:4 752 (1 inch to 6 chains), 1:6 336 (1 inch to 8 chains), 1:5 000 and 1:6 000.
Sheet sizes of the cadastral map series vary from A1 595 x 891 mm to 760 x 1015 mm (30" X 40") and the price is from $2.00 to $4.00 per plan print approx. Plan prints available only from District Offices.

CADASTRAL RECORD MAPS

The Department maintains cadastral record maps of all town, urban and rural districts and besides the cadastral information these sheets show the survey plan numbers and other related details.
These sheets were produced at various scales but are now being prepared at 1:1 000, 1:2 000, 1:10 000 scale. Prints of all sheets are available from the Chief Surveyor.

street maps

Full colour maps of the major towns and cities showing streets, bus routes and places of interest with an index to names. The maps are the NZMS 271 metric edition series Earlier NZMS 17 series are marked *.

$2·00 per sheet.

/4 ANTIPODES ISLANDS	$ 1.20
/6 RAOUL ISLAND	$ 1.20
NZMS 295 ATLAS OF THE SOUTH PACIFIC	$15.00

Available from Map Sales Branches of the Department of Lands and Survey at:

and Authorised Map Selling Agencies in major towns and cities.

WHERE TO PURCHASE AND METHOD OF ORDERING

The local map selling agents, in general, stock limited supplies of maps of interest to their particular area. If, however, your needs are special or unusual and do not appear to be covered by the contents of this booklet, do not hesitate to seek advice on the subject or to consult the nearest office of the Department of Lands & Survey where a full map catalogue is available. The Department and its selling agents will be happy to assist you, and you will find that most special needs can be met adequately. Advice costs nothing and helpful and interested cooperation is assured.

NOTE— It is usual to describe maps by their scale factors, e.g. 1:63 360, 1:50 000, etc. This is a technical way of stating that 1 in. on the map surface equals 63 360in. (1 mile) on the ground; or that 1 mm on the map surface equals 50 000mm (50 metres) on the ground; and so on.

It should also be noted that all map series have a unique New Zealand Mapping Service code number, e.g., NZMS 261. When ordering maps it is advisable to quote this code number and the sheet number if known (see the index maps in this booklet). No confusion should then arise as to which map you require.

Most maps are available folded or rolled in mailing tube, – extra charge for tube.
